

I respectfully urge the FCC to reject the NAB's petition 04-160, which would stop XM radio from providing instant traffic and weather. I live in the Baltimore area, and XM radio is the only way I have access to traffic and weather information in my car ANY TIME OF THE DAY. Local stations generally only provide this information during rush hour, but I am in my car many other times during the day when this information (particularly the traffic information) can be critical to my easily and in a timely manner getting to and from important destinations. To limit my ability to have access to this information -- which I am currently receiving -- would, simply put, be wrong, not to mention a violation of rights.
